

# **Future generation of light attack helicopters and multi-role drones**

**Helicopter Technology  
Central and Eastern Europe  
Meeting in Prag / 21.05.2025**

# Conclusions from Ukraine

## Weaknesses:

Service halls  
Airplanes  
Helicopter  
Runways

## Advantages:

Guerrilla warfare  
- hit and run  
- artillery

Drones

# The problem

## Maintenance hall's for helicopter:

Large space requirement due to the rotor diameter

### EC 665 Tiger:

Rotor Ø: 13 m

Height: 3,8 m / 5,2 m

### Airbus H145M:

Rotor Ø: 11 m

Height: 4,0 m

# The solution

## Vanisher 1-A:

Rotor Ø: 4,5 m

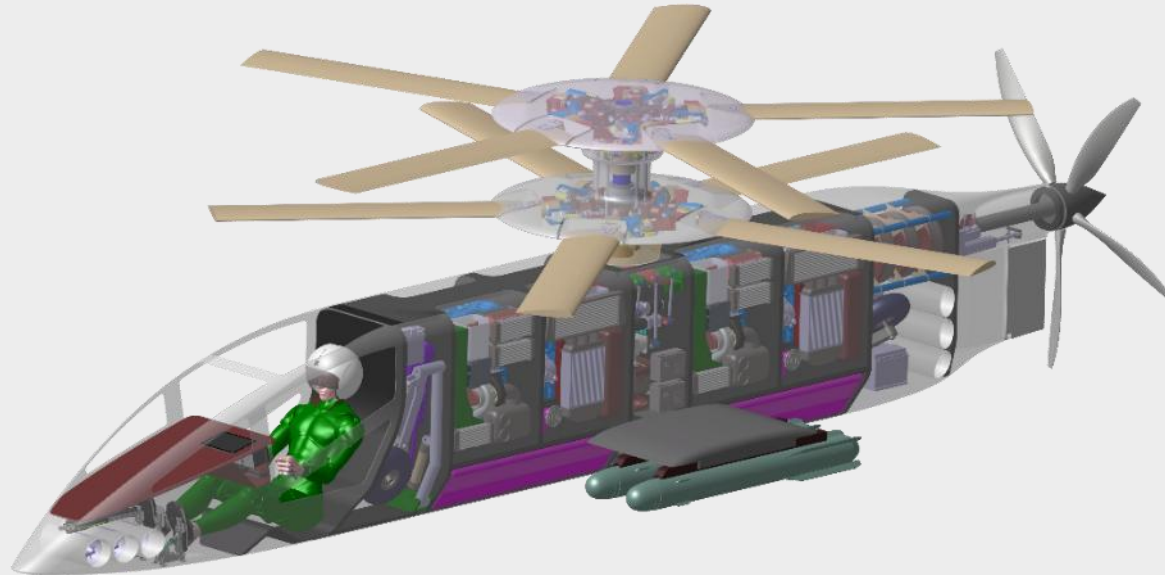

Height: 2,5 m

Length: 7,8 m

Power: 936 kW

MTOW: 2.300 kg

Payload: 550 kg

Speed: 650 km/h

Range: 650 km

Separating the power module from the gearbox

# Guerrilla air warfare

Natural habitat:

Example: north of Finland (Lapland)

# Guerrilla air warfare

Natural habitat:

Safe house and  
maintenance

hidden flight

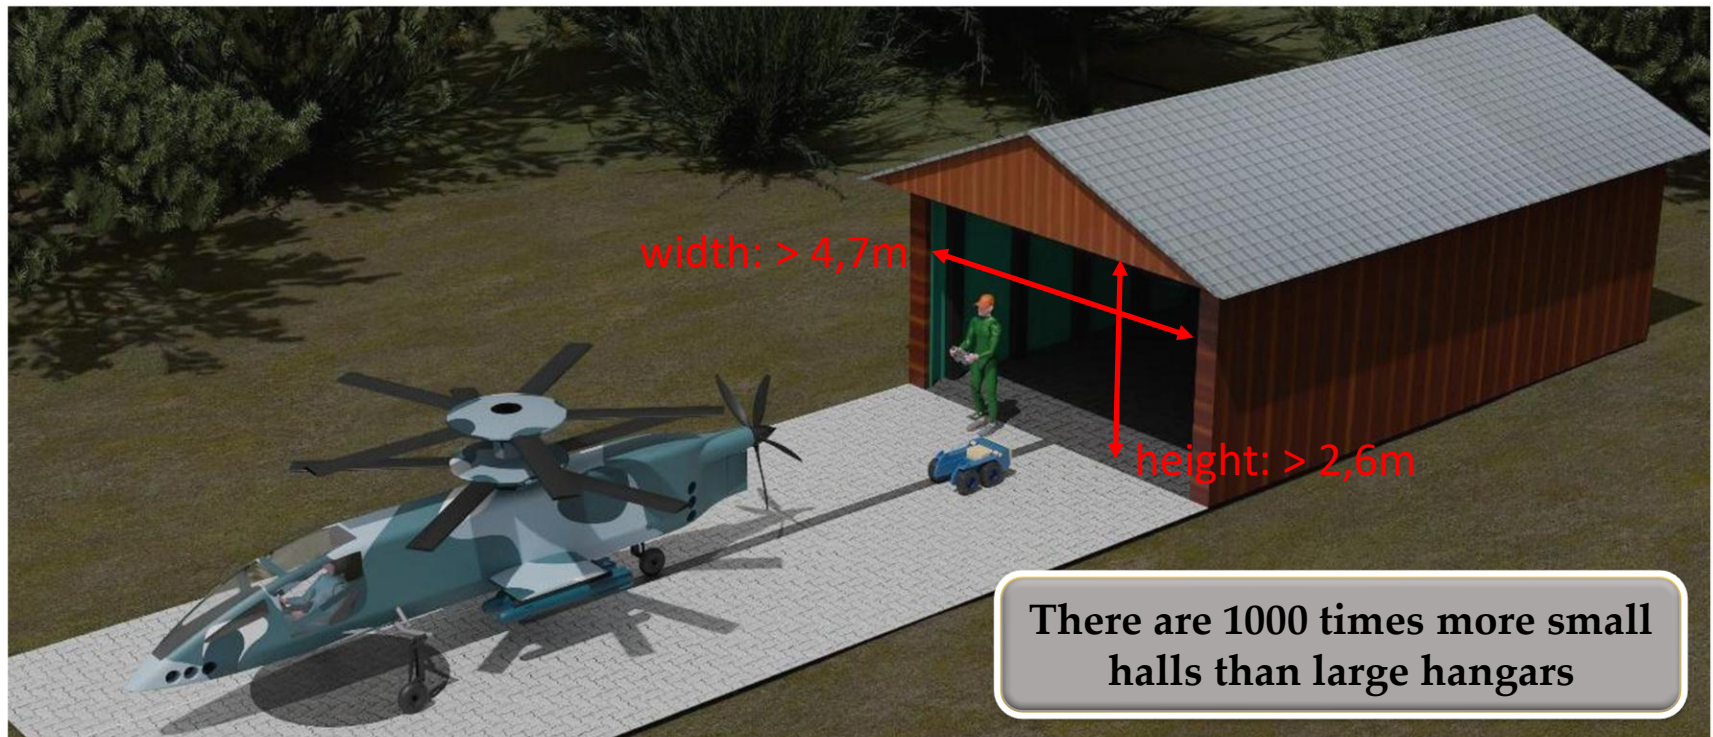

# Guerrilla air warfare

Safe house:

Minimal space requirement

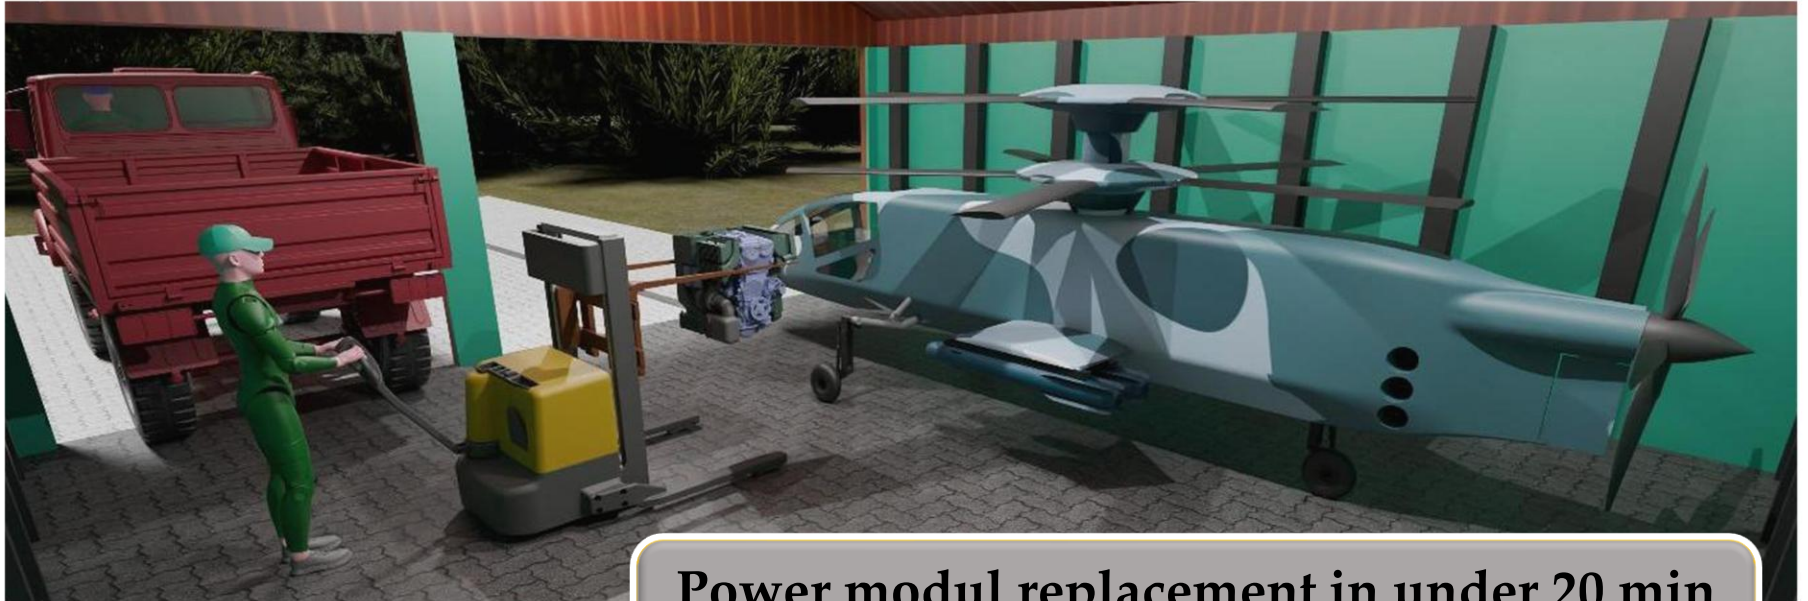

# Guerrilla air warfare

## Modul System:

> 95 % Ready to fly  
(operational readiness)

no mechanical connection between  
power module and gearbox

power module could be  
serviced at a different location

Power modul replacement in under 20 min  
( quick fasteners used for dismantling )

# Summary

---

## Vanisher 1-A:

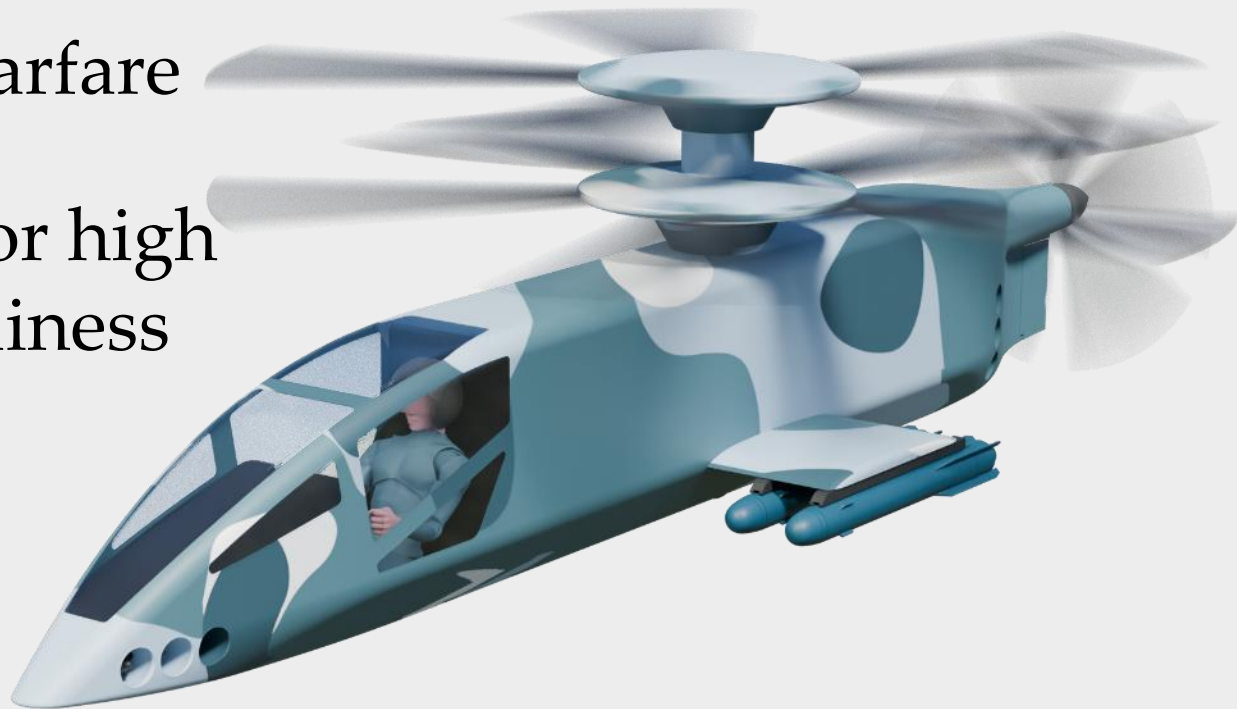

Light attack helicopter with  
completely new flight characteristics

Guerrilla **air** warfare

Modul system for high  
operational readiness

1 Pilot

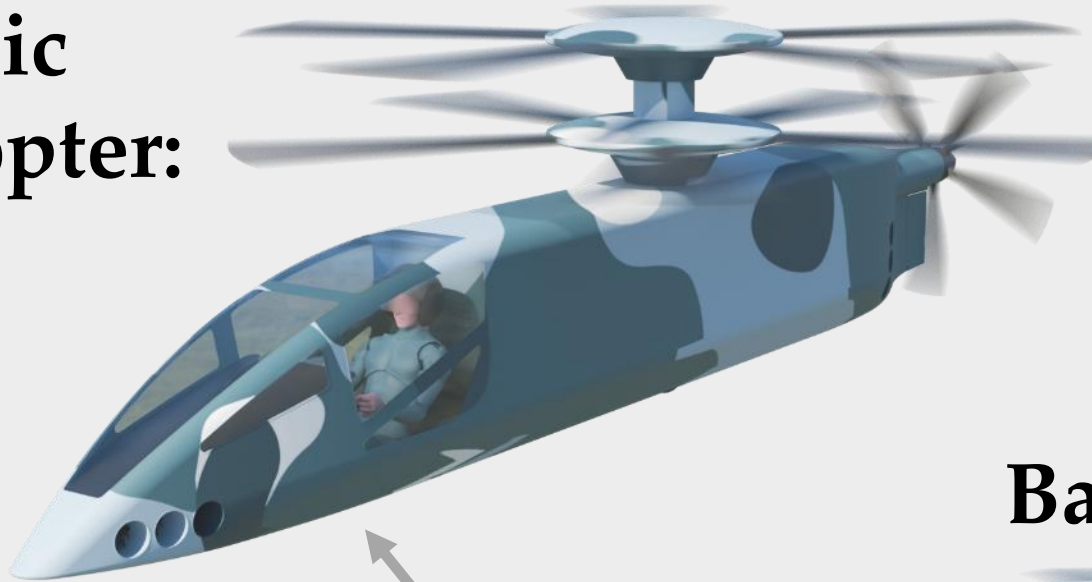

8 Brimstone

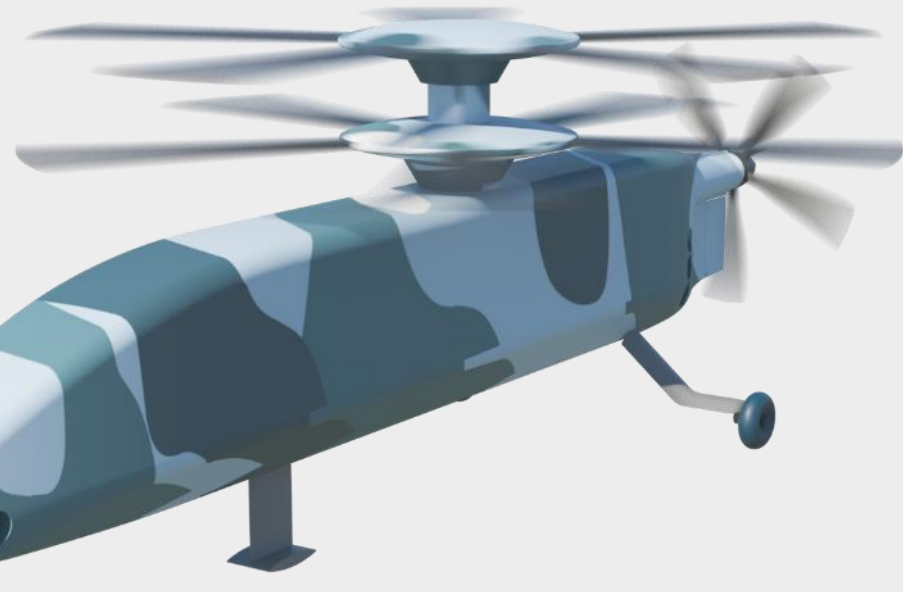

# Modular add-on systems

# Modular add-on systems

**Basic  
Helicopter:**

**Basic Drone:**

same main parts  
same dimensions

different landing gear

# Modular add-on systems

Basic  
Helicopter:

Light Attack Helicopter

Loitering ammunition defense

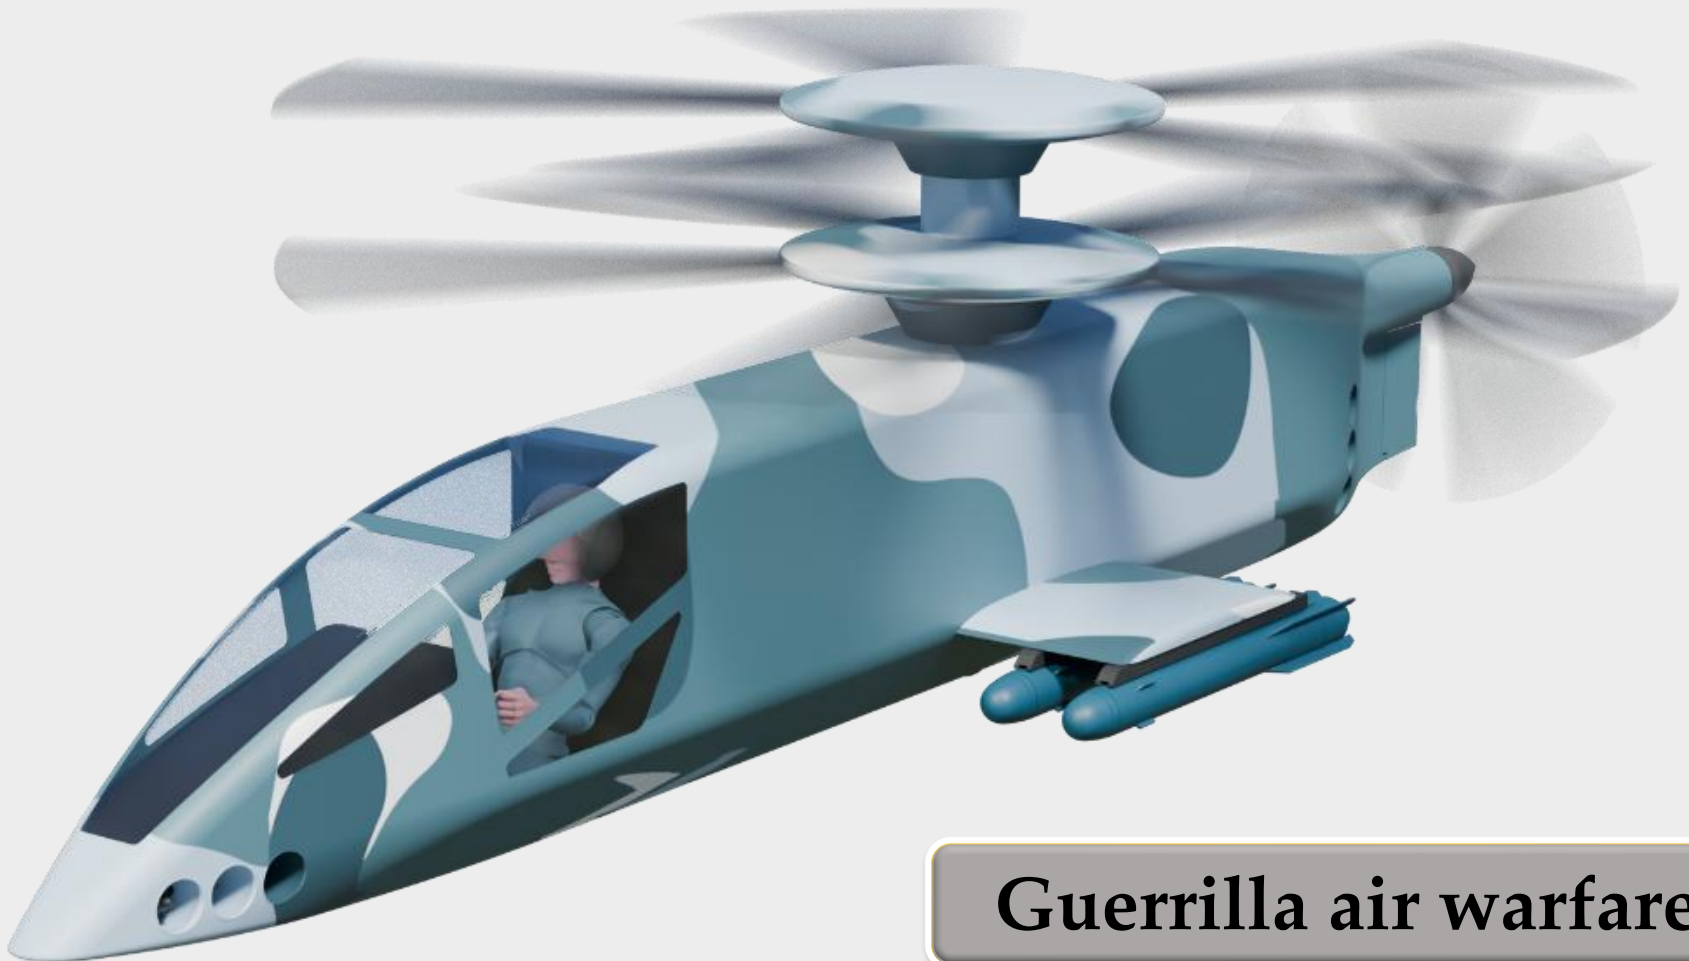

Rescue Helicopter

Replacement of the modules in 15 minutes

# Vanisher 1-A

---

Light attack helicopter:

Guerrilla air warfare

# Vanisher 1-D

---

**Loitering ammunition defense:**

**Cleaning off a city's sky**

# Vanisher 1-R

---

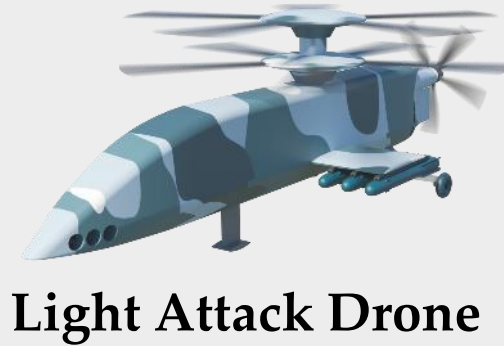

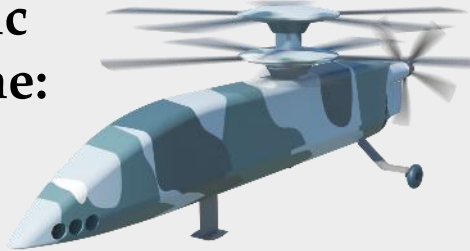

**Rescue helicopter:**

**Food supply + rescue mission**

# Modular add-on systems

Basic  
Drone:

Light Attack Drone

Rescue Drone

Mothership  
Drone

Replacement of the modules in 15 minutes

# Vanisher D-A

## VTOL Predator Drone

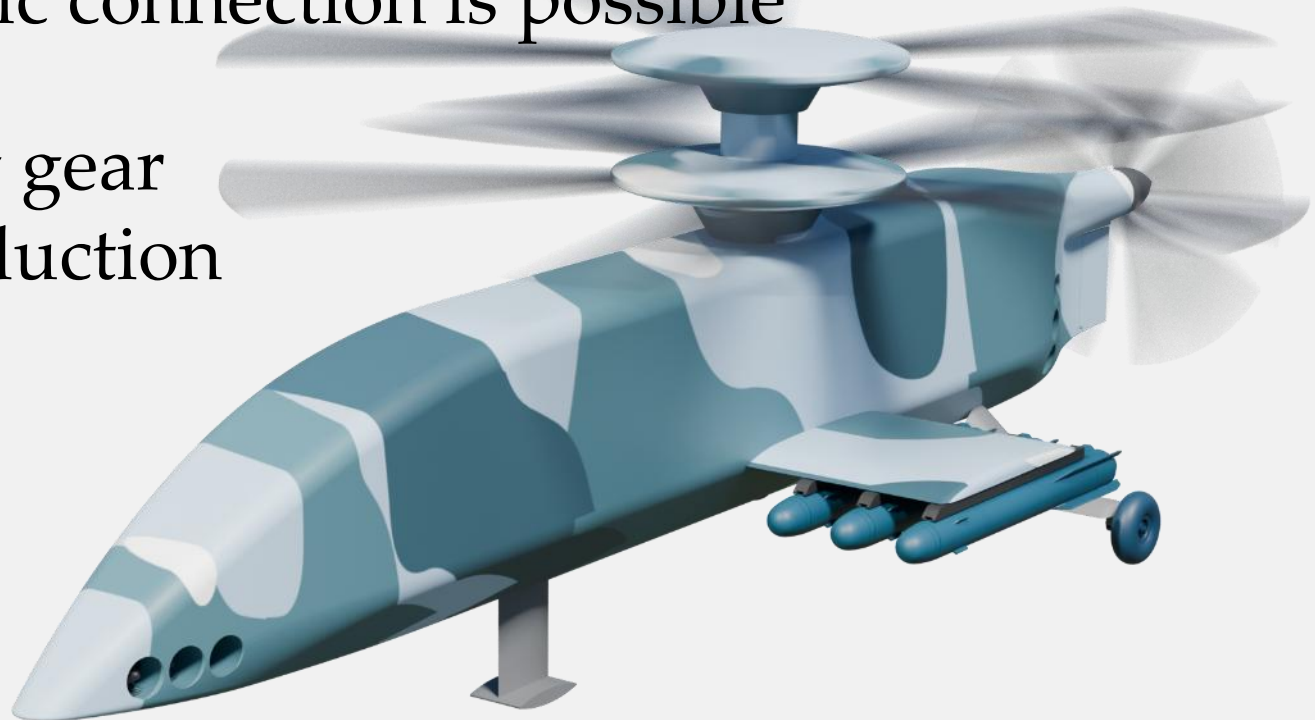

Light attack drone:

Same CAD construction as the helicopter

Glas fiber optic connection is possible

Fixed landing gear  
Top speed reduction

No Pilot  
10 Brimstone

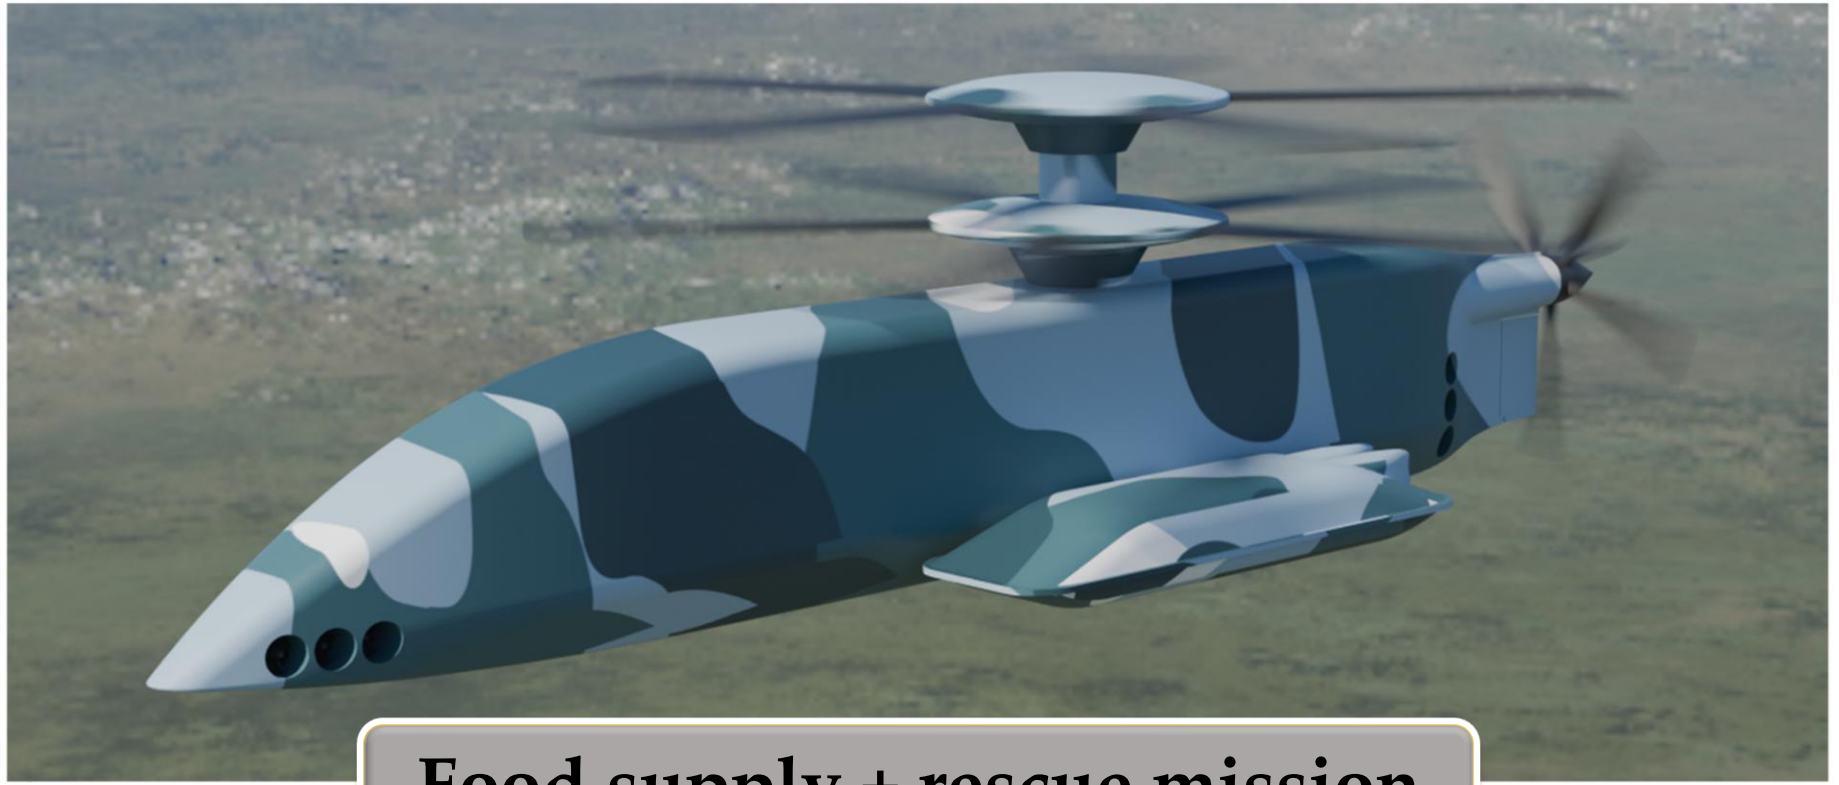

# Vanisher D-R

**Rescue drone:**

→ 300 kg of food in  
← 2 injured soldiers out

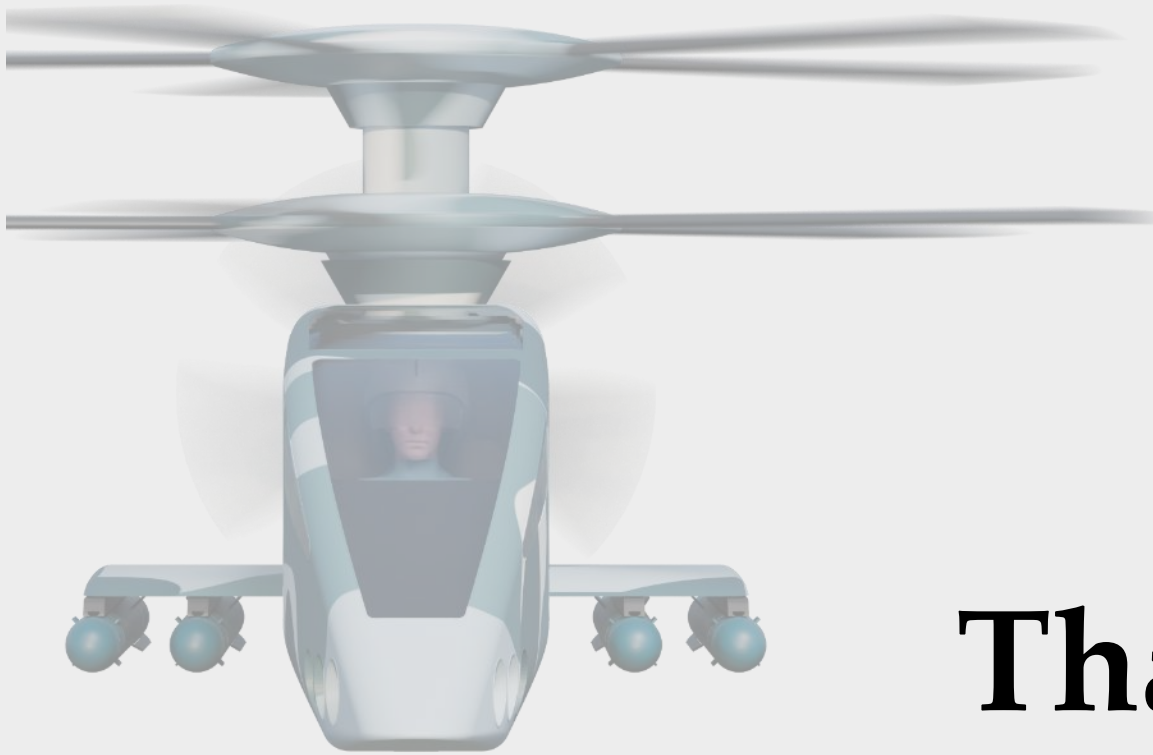

**Food supply + rescue mission**

# Vanisher D-M

**Mothership drone:**

**Space for 12 RPG FPV drones**

# Thanks for your attention.
